- Brainster, Intensive Course for Data Science.
- TOEFL, Overall: 118 points.
- European Political Youth Exchange, Certificate from UPENN Brussels.

## Hobbies and Interests

- Swimming, Swimming is one of my favorite hobbies as it offers a great way to stay active while also providing relaxation and stress relief. Being in the water and feeling weightless allows me to clear my mind and focus on my breathing and movements. Swimming is a fun and enjoyable hobby.
- Volunteering, Volunteering in elderly or animal caring facilities makes me feel better about myself in a way that I

can't describe. Since I can remember, I have loved taking care of older people. That's why I always volunteer to go and read them some books or help the staff with the dinners or wash the remains plates.

- Engineering, International Communication, As an engineering student, I love being associated with math and physics. I do a lot of work with some non-profit organizations to improve the educational system in Skopje. I love working in a group and making something work for the better.
