EDUCATION

International Balkan University
B.S. Computer Engineering

Oct. 2022 – Current
Skopje, NMK

Towson University
B.S. Computer Science

Jan. 2025 – Jun. 2025
Towson, MD

- **Exchange:** UGRAD scholarship
- Dean's List for spring semester

SKILLS

Languages: Albanian(native), Macedonian(native), English(fluent), Turkish(fluent), Serbian(fluent), Bosnian(fluent), German(A2),
Languages (*In order of most proficient*): Swift 5+, JavaScript (ES6+), Python, Solidity, Rust

Libraries/Tools:

- **Blockchain:** IPFS, Alchemy, Candy Machine (Solana)
- **AI/ML:** LangChain, NLTK, scikit-learn.
- **iOS:** SwiftUI, UIKit, Realm
- **Web:** React.js & Node.js

Machine Learning & AI: Python, TensorFlow/PyTorch, model training, evaluation.

Outbound Marketing & Tools: Clay, BuiltWith, Apollo, HubSpot, Lemlist, Instantly.

AI for Marketing: ChatGPT, Jasper, Copy.ai (personalization, automation, copywriting).

Testing & Optimization: A/B testing, email deliverability, campaign metrics analysis

EXPERIENCE

Kodland
Tutor

Sep. 2025 – on going.
London, United Kingdom

- Delivered foundational and advanced programming instruction as a Python and Python Pro Tutor, guiding students through complex logic, debugging, and project execution.
- Collaborated on a specialized curriculum development team to design, structure, and prepare a comprehensive new educational course focused on AI tutoring.
- Evaluated student code and project architecture, providing targeted feedback to improve Python syntax, algorithmic accuracy, and performance optimization.
- Translated advanced technical concepts into accessible, engaging lessons to build problem-solving skills and technical proficiency in emerging developers.

Roamler
Junior Python Developer

Oct. 2025 – on going.
Amsterdam, Netherlands

- Developed and deployed intelligent chatbots powered by Large Language Models (LLMs), writing scalable Python backend code to handle complex conversational flows and user interactions.
- Designed and trained sophisticated machine learning models utilizing extensive PyTorch and TensorFlow libraries to support data-heavy AI applications.
- Optimized LLM performance and model accuracy through rigorous fine-tuning, prompt engineering, and continuous testing within real-world environments.
- Maintained robust Python architectures to ensure the seamless integration, deployment, and scaling of advanced AI and machine learning features.

Microsoft <i>AI/ML Research Intern</i>	Jul. 2025 – Aug. 2025 Dubai, United Arab Emirates
- Supported ongoing research & development projects in machine learning, computer vision, and natural language processing (NLP). - Optimized ML models through continuous testing and performance evaluation, applying a data-driven approach like outbound campaign testing. - Trained and evaluated ML models, focusing on accuracy and performance optimization. - Collaborated with engineers and researchers to refine algorithms and improve model robustness.	
U.S Department of State <i>Cultural Ambassador</i>	Jan. 2024 – Jun. 2025 Skopje, NMK
- Represented North Macedonia in the U.S. through the UGRAD program. - Promoted cultural exchange, academic excellence, and cross-cultural dialogue across diverse communities. - Developed skills in intercultural communication and public speaking.	
Towson University <i>Research Assistant</i>	Mar 2025 – May 2025 Towson, MD
- Assisted with research projects using MATLAB. - Collaborated on academic tasks requiring advanced technical and communication skills.	
Junior Achievement USA <i>Volunteer</i>	Jan 2025 – May 2025 Baltimore, MD
- Facilitated workshops and activities introducing students to entrepreneurship, financial literacy, and career readiness. - Focused on youth mentorship and community engagement.	
Volt Cards COO	Oct 2023 – Jan 2025 Skopje, NMK
- Co-founded and co-owned the startup, playing a key role in strategic planning and business development. - Oversaw financial obligations including budgeting, accounting, and expense management. - Developed client outreach strategies, managed branding and communication, contributing to growth through structured campaigns.	
Glorium Technologies <i>Intern</i>	May 2024 – Sep 2024 New Jersey, USA
- Contributed to software development projects, QA testing, and team collaboration. - Utilized JavaScript, React.js, and software engineering best practices.	
James Hospitality <i>Server</i>	Jun 2023 – Sep 2023 Maryland, USA
- Supported hotel management operations, time management, and customer service. - Work and Travel program.	
Ka Group <i>Intern</i>	May 2022 – Sep 2022 Turkey
- Contributed to digital marketing and field production tasks.	
Arti İletişim Yönetimi <i>Software Engineer Intern</i>	Jun 2019 – Jun 2019 Istanbul, Turkey
- Assisted with PR and event organization for the “Boyer Now” launch.	

AWARDS & CERTIFICATES

European Political Youth Exchange — Certificate from UPENN, Brussels.

First Place – Model United Nations (MUN) – RIT Kosovo — Awarded for outstanding diplomacy, negotiation, and public speaking performance during the 2024 RIT Kosovo MUN Conference.

First Aid Certificate (Red Cross) — Rescuing in water and first aid for heart stop.

Participation Award – Model United Nations (MUN) – Amsterdam — Recognized for active engagement and contribution during the international MUN conference in Amsterdam, 2021.

Brainster — Intensive Course for Data Science.

TOEFL — Overall: 114 points.

NOTABLE GRANTS

U.S. Department of State's Global UGRAD Exchange Program — (2024 – 2025) Maryland Business Innovation Association Selected as a Cultural Ambassador to represent North Macedonia in the U.S., fostering cross-cultural dialogue and academic excellence. Participated in community projects and built strong intercultural communication skills.

Volt Cards | COO & Co-Founder

As a developer on the BeeRide app, I contributed to a transportation platform similar to Uber, available on both the App Store and Play Store.

The app has GPS technology for real-time location tracking of users and drivers, ensuring precise pickups and drop-offs.

It has multiple payment options, including cash and online payments, to enhance user convenience.

Gained a very good experience on Firebase, Google Maps, etc...

Kodland | Python Pro Tutor & AI Specialist

Engineered and deployed an automated AI scheduling bot, streamlining internal operations by delivering real-time, automated schedule notifications directly to the tutoring staff.

Spearheaded internal AI adoption, training and mentoring fellow tutors and recruitment staff on the effective integration of emerging AI tools to optimize daily workflows and hiring processes.

Delivered advanced Python instruction and collaborated on a specialized curriculum development team to design and prepare a comprehensive new educational course focused on AI tutoring.

Evaluated student project architectures, providing targeted feedback to improve algorithmic accuracy, code quality, and performance optimization.
